

My answers/logic:

1. So for the first one, Zoey says "Don't ask Yemmi then, shes a knave" and in response Yemmi says "Actually Zoey and I are both knights "
If what Yemmi claims was true Zoey wouldn't have said that Yemmi were a knight meaning Yemmi is lying and Zoey was Telling the Truth.
Zoey: Knight
Yemmi: Knave

2. Abigail says "Either I am a Knave or Barton is a Knight"
Here we can just go down the potential possibilities.

- If Abigail is a Knight that means that she could be a Knave making them both Knights
- If Abigail is a Knave she couldn't tell the truth so that would make Barton a Knave too.
So Either Abigail and Barton are both Knights or both Knaves

3. Ran into Anderson, Barthalomew and Camila.

- Anderson: "All of us are Knaves"
- Bartholomew: "Exactly one of us is a knave"
From this we can immediately rule out Anderson as a knight. If he were a knight he'd have to be telling the truth making him not a knave meaning he's lying/a knave and that atleast one of them is a Knight.

If Bartholomew is lying that would make 2 of them Knights but we already know that Anderson is a Knave so that means he's telling the truth making him a Knight and meaning Camila is a Knave

Anderson: Knave

Bartholomew: Knight

Camila: Knave

4. "Is either of you a knight" I asked. The person responded right away and I knew the answer to my question. What is the person to whom I'm

addressing and what is the other person.

So we can just go through all of the possibilities with this one.

If they answer yes either they are telling the truth or they could be lying so we don't know the answer.

If they answer no they couldn't be a knight meaning they're a knave and the other must be a Knight

Person answering: Knave

Other: Knight
